

Spread the news!

Harvest Moon: Light of Hope is now SPECIAL EDITION on Steam!
We have just released version 2.0.0, which includes all the enhancements and new features found in the Special Edition, including a new marriageable candidate: Soleil! Soleil also functions as a local co-op character, where you and a friend can play Harvest Moon: Light of Hope Special Edition together!
This update also means the four DLC available for the Special Edition on other platforms are available to purchase on Steam as well! And on top of that... Harvest Moon: Light of Hope Special Edition for Steam is 30% Off for a week to celebrate this major update!
Download your copy today: Harvest Moon LOH SE for Steam.
